PROFESSIONAL SUMMARY

Full Stack Developer (B.Tech IT, 2026) with experience building web applications using **MongoDB, Express.js, React.js, Node.js, Python, Django, and PostgreSQL. Built REST APIs**, JWT-based authentication with role-based access control, and React interfaces across three internship/trainee roles and four projects, including an LLM-powered task assistant using LangChain and RAG. Hands-on experience in API testing, debugging, and application development. Seeking opportunities as a Full Stack Developer, Software Engineer, or Python Developer and QA Engineer.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, C++
Frontend: React.js, HTML5, CSS3, Tailwind CSS, React Router
Backend: Node.js, Express.js, Fastify, Django, Django REST Framework, REST APIs
Databases: MongoDB, MySQL, PostgreSQL
API & Validation: OpenAPI, Zod, REST API Integration, API Debugging
Authentication: JWT, OAuth 2.0, OTP-based Authentication, Role-Based Access Control (RBAC)
Testing & QA: Manual, Functional & Regression Testing, API Testing, Test Case Design, Bug Reporting, Postman
Developer Tools: Git, GitHub, VS Code, npm
Deployment: Render, Basic Cloud Deployment, Environment Variables
Concepts: OOP, DBMS, Operating Systems, SDLC, STLC, Data Structures & Algorithms

EXPERIENCE

Python Full Stack Trainee — **Future Finder** — Jan 2026 – Jun 2026

- Built RESTful APIs with authentication and CRUD operations across multiple modules, translating functional requirements into backend logic.
- Contributed to a recommendation engine feature, and wrote 10+ API test cases with a 3-member team to find and fix defects.

Full Stack Developer Intern — **ThinkNext Technologies** — May 2025 – Nov 2025

- Developed backend modules using object-oriented design to support core application workflows.
- Integrated REST APIs and optimized SQL queries to improve data retrieval efficiency.
- Managed code with Git and validated fixes against test plans before release.

Developer Intern — **Devtown** — Aug 2024 – Mar 2025

- Automated data cleaning and validation in Python to support backend testing workflows.
- Diagnosed and resolved application performance bottlenecks.

PROJECTS

AI-Powered Task Management REST API — *Python, Django REST Framework, PostgreSQL*

- Designed a relational schema with 2+ database models and REST APIs for user and task management with full CRUD support.
- Secured multi-user access with JWT authentication and role-based authorization across 3 roles.
- Integrated an LLM assistant using LangChain and RAG to summarize tasks and answer natural-language queries.

Meter & Transformer Management Platform — *TypeScript, Fastify, React.js, Tailwind CSS, Zod*

- Built a TypeScript/Fastify REST API with validation, pagination, filters, and OpenAPI docs.
- Built a React dashboard with protected routes, detail views, and authenticated CSV export; deployed on Render.

E-Commerce Web Application — *React.js, Node.js, Express.js, MongoDB, JWT, REST APIs*

- Built a full-stack e-commerce platform with major modules, including products, cart, and order management.
- Implemented secure authentication using JWT and OTP verification, with protected routes and role-based access control separating customer and administrator workflows.

Price Comparison Web App — *React.js, Node.js, Express.js, MongoDB, REST APIs, RapidAPI*

- Developed reusable React components for product search, filtering, and side-by-side comparison.
- Built Node.js/Express REST APIs to fetch, normalize, and serve product data.

EDUCATION

Bachelor of Technology in Information Technology — **2026**
Chandigarh Engineering College, Landran (IKG Punjab Technical University) — CGPA: 7.6/10

CERTIFICATIONS & ACHIEVEMENTS

AWS Data Engineering Certification | Oracle Agentic AI Foundations Associate
Smart India Hackathon 2024 – Participant | Blockchain Workshop – IIT Hyderabad
